

## Press Release

**BIM World MUNICH 2021 - The largest event for the digitalization of the construction industry took place in presence and with an enormous response of the professional audience.**

Munich, November 30, 2021. Under strict hygiene regulations, the 5th BIM World MUNICH from November 23 to 24, 2021, finally enabled the much-needed personal exchange of all industry stakeholders once again and asserted itself as the most important international meeting place for the digitization of the construction and real estate industry. With a consistently positive atmosphere, the focus was on direct contact with customers, interested parties and professional colleagues from the 189 exhibitors and over 150 speakers.

"With over 3,000 trade visitors, we are more than satisfied. BIM World was once again THE hub for exchanges on all relevant digitization topics and trends, as well as on sustainability and the circular economy. It has impressively proven that it is the central platform for business development of all stakeholders and participants involved." Christian Stammel, Managing Director and organizer of BIM World MUNICH, affirms.

Building Information Modeling is developing into the central data exchange of all trades involved in construction and is thus becoming more important than ever. The influence of BIM processes and data models extends far beyond the actual planning area. BIM World MUNICH demonstrated this impressively with the topics BIM4Machines, BIM4Construction, BIM4Materials and BIM4RealEstate and the cross-sectional topics BIM4Netzero and BIM4Sustainability.

In the numerous presentations and discussion panels of the key players in the industry and innovative start-ups from the various disciplines, all experts confirmed: The digital twin of buildings and infrastructure must be in focus - based on structured, reliable, and dynamic data. "Enriched " with IoT technologies and solutions, these digital twins will become the key elements of digital strategies of companies, large real estate operators, municipalities, and cities.

The new field of opportunities and innovations was demonstrated by the participants of BIM Town and the 4th Smart Building / Smart Construction Innovation World Cup®. The top 12 finalists pitched their innovative solutions in front of the impressed audience on the main stage. The top-class jury evaluated the start-ups live on site and chose Treble Technologies as the winner. The Icelandic start-up develops a highly specialized software for sound simulation already in the planning phase of buildings and is now officially the global TOP Smart Building Innovator 2021.

Dietmar Bernert, President of BIM World MUNICH, sums up: "BIM World 2021 has once again impressively shown that it is THE must-attend event for the digitalization of the construction and real estate industry. In the excellent technical discussions, due to the extremely high quality of the visitors, it became clear that personal exchange is irreplaceable. That is why I am already very much looking forward to seeing you again at BIM World MUNICH in 2022."

The 6th BIM World MUNICH will take place on November 22 and 23, 2022 at the ICM in Munich.

**About BIM World MUNICH**

*For the past six years, BIM World MUNICH has been the leading networking platform in D-A-CH for national and international players in the digitalization of the construction, real estate and urban development industries. Held annually in Munich, the event consists of a 2-day international congress on three stages and a trade fair with integrated open forums, as well as the BIM Town Innovation Area with pitch sessions and the presentation of the Smart Building/Smart Construction Innovation World Cup® Awards. With key players in the industry, as well as numerous innovative start-ups and over 200 speakers, BIM World MUNICH brings together the entire BIM ecosystem and is THE meeting place for all industry players involved. Executive Partners 2021 were: AUTODESK, Hauptverband der Deutschen Bauindustrie, BIMsystems, buildingSMART Germany, GS1, Hexagon, IP500, Mittelstand 4.0 Kompetenzzentrum Planen und Bauen, NEMETSCHKE GROUP and Nova Building IT. The 6th BIM World MUNICH will take place from 22-23 November 2022 at the International Congress Center Munich. [www.bim-world.de](http://www.bim-world.de).*
