

BIM World MUNICH 2026 | 24 – 25 November

POLAND is the official partner country of BIM World MUNICH 2026

Munich, May 5th, 2026 - With its systematic, pragmatic, and innovation-oriented approach, Poland is a model country when it comes to the digitalization of the real estate industry. This is why BIM World MUNICH is delighted to announce that Poland is this year's partner country.

Poland adopted international standards (ISO 19650) at a very early stage and accepted this standard as a reference framework. In doing so, the country placed great emphasis on quality and acceptance, not merely on formal compliance. **BIM** is viewed there as a **transformation process**, not as a mandatory software requirement.

The goal is not merely to modernize the construction industry. In addition to increasing efficiency and optimizing costs, the **focus is also on environmental aspects**, such as through **improved life cycle analyses, optimized resource management, and CAFM**.

Poland is now regarded as a driving force for the European BIM community.

A key milestone was the gradual integration of BIM into public procurement procedures. The process is supported by close collaboration between ministries, research institutions, industry associations, and companies. Standards, training programs, and regulatory frameworks, among other things, have been developed.

Poland achieves better data interoperability and more efficient planning and construction processes through its focus on Open BIM, the use of open standards, and innovation.

“Poland has a dynamic BIM community, high technical expertise, and great innovative strength. We are very pleased to have secured Poland as our partner country for 2026 and to be working together to provide new impetus for the further development of BIM and CAFM in Europe,” explains Christian Stammel, Managing Director of RM Rudolf Müller Events GmbH.

buildingSMART Poland actively supports the adoption of open standards and the training of skilled professionals. At the same time, BIM is increasingly being integrated with future technologies such as **digital twins, IoT integration, and AI-driven data utilization**. This inherently creates a sustainable, resource-efficient, and transparent construction process as well as real estate operations.

“We view Poland’s status as the partner country for BIM World MUNICH this year as a strong sign of the growing importance of the Polish BIM community in Europe. We look forward to an intensive dialogue, new partnerships and joint initiatives that are aimed at making the construction industry future-proof” - says Anna Rydzy, Chief Operating Officer of buildingSmart Poland.

BIM World MUNICH 2026 | 24 – 25 November

Visitors and experts attending **BIM World MUNICH** can experience presentations from Poland on outstanding projects and technologies on **November 24 and 25, 2026**, at the **ICM – International Congress Center Messe München**.

The preliminary program is expected to be released this summer and tickets are available at:

About BIM World MUNICH

*Since 2016, BIM World MUNICH has been the international platform for all players in the digitalization of the construction, real estate, and facility management industries. The annual event in Munich consists of a two-day international congress on three stages and a trade fair with three integrated open forums, as well as the BIM Town Innovation Area featuring pitch sessions and the presentation of the Smart Building/Smart Construction Innovation World Cup[®] Award and the CAFM World area. With over 8,500 key industry players, as well as numerous innovative startups and over 250 speakers, BIM World MUNICH brings together the entire BIM ecosystem and is THE meeting place for all industry stakeholders. The **10th BIM World MUNICH** will take place **on November 24 and 25, 2026**, at the ICM – International Congress Center Messe München.*

About buildingSMART Poland

buildingSMART Poland provides an open and neutral arena for highly skilled industry professionals to contribute to the topic of openBIM. Through its industry association and strong membership engagement, buildingSMART Poland aims to transform the built asset industry in its market. As a newly approved Chapter, buildingSMART Poland aims to deliver more value through a collection of resources that includes European construction sector reports, BIM use case studies and membership policies and regulations.
