

# Czech Republic is the official partner country of BIM World MUNICH 2025

*Munich, 04 September 2025 – The Czech Republic will be the official partner country of BIM World MUNICH 2025, underlining the country's strong commitment to the digitalization of the construction and real estate industry. With a politically anchored BIM strategy, the Czech Republic is among the European pioneers in establishing legislative and practical frameworks for future-proof, efficient, and sustainable construction processes.*

A key milestone has been the adoption of the **BIM Act** by the **Ministry of Industry and Trade (MIT)**, making the Czech Republic one of the first European countries with a dedicated legal framework for BIM. Alongside this legislative step, the ministry is driving the development of a **national data standard for construction** to ensure interoperability, data quality, and seamless collaboration across stakeholders. By continuously updating its BIM Implementation Concept, the Czech Republic actively supports public contractors and the entire market in the transition toward digital, efficient, and sustainable construction practices.

At the practical and industry level, **czBIM / buildingSMART Czech Republic (bSCZ)** has become the central platform for the standardization, education, and popularization of BIM. Since 2021, bSCZ represents buildingSMART International in the Czech Republic and builds bridges between experts, schools, and institutions. Its activities range from **BIM Academy workshops** for students and professionals to the organization of the international **BIM DAY 2025** in Prague. In addition, more than 500 experts have already been certified under the **buildingSMART Professional Certification Program (PCERT)**, with new qualification levels under development.

The Czech Republic is strengthening its position at the forefront of the digital transformation of construction in Europe. With the combined commitment of the Ministry of Industry and Trade and czBIM/bSCZ, legislative, technical, and educational aspects are interconnected to ensure that BIM becomes practically applicable across the public and private sectors.

Visitors and experts at BIM World MUNICH will be able to experience contributions from the Czech Republic as well as other outstanding projects and technologies on **November 26–27, 2025** at the **ICM – International Congress Center Messe München**.

Tickets are now available at: [www.bim-world.de/registration](http://www.bim-world.de/registration)

## **About BIM World MUNICH**

Since 2016, BIM World MUNICH has been the international platform for all players in the digitalization of the construction, real estate and facility management industries. The annual event in Munich consists of a two-day international congress on four stages and a trade fair with integrated open forums, as well as the BIM Town Innovation Area with pitch sessions and the presentation of the Smart Building/Smart Construction Innovation World Cup® Award. With over 8,000 key players in the industry, as well as numerous innovative start-ups and over 250 speakers, BIM World MUNICH brings together the entire BIM ecosystem and is THE meeting place for all industry players involved.

The 9th BIM World MUNICH will take place on November 26 and 27, 2025 at the ICM – International Congress Center Messe München.

## **About czBIM / buildingSMART Czech Republic**

czBIM – buildingSMART Czech Republic is the independent national platform for the development and implementation of BIM. Representing buildingSMART International since 2021, it focuses on standardization, education, and professional certification in BIM. With initiatives like the BIM Academy, BIM DAY, and the implementation of the international PCERT program, czBIM/bSCZ actively supports the qualification of experts and strengthens the use of BIM across the construction industry.
